

Chain of Responsibility (CoR) – Heavy Vehicle National Law (HVNL)

PEP Transport is committed to safety through full compliance with the Heavy Vehicle National Law (HVNL) and Chain of Responsibility (CoR), which holds all parties in the supply chain accountable, not just drivers. Consignors, packers, loaders, fleet managers, drivers, and consignees each have clear responsibilities to ensure safe and compliant practices.

PEP Transport does not tolerate CoR breaches and works closely with partners to uphold safety, compliance, and accountability, protecting both people and the community.

WESTERN AUSTRALIA

Main Roads WA Accreditation

PEP Transport proudly holds the Main Roads WA Heavy Vehicle Accreditation (WAHVA), demonstrating our commitment to safety, reliability, and compliance.

This accreditation, verified through independent audits, covers fatigue and maintenance management, loading standards, and ongoing accountability through annual reviews.

For our clients and partners, it means confidence that our drivers are compliant, our vehicles are roadworthy, and our operations meet the highest safety and performance standards.

Our ISO Certifications

PEP Transport holds ISO 9001 (Quality Management) and ISO 45001 (Health & Safety) certifications, reinforcing our commitment to international best practice.

These standards ensure we consistently deliver quality services, drive continuous improvement, and maintain a customer-first approach, while also prioritising workplace safety, exceeding legal obligations, and fostering a culture of wellbeing for our people, contractors, and stakeholders.

Guardian by Seeing Machines

PEP Transport leverages advanced technology to enhance fleet safety and performance, going beyond compliance to protect drivers, clients, and the community. Through Guardian by Seeing Machines, our vehicles are equipped with AI-powered fatigue and distraction monitoring that detects drowsiness or inattention and sends real-time alerts to our monitoring centre, enabling swift action to prevent incidents.

MTData Telematics

PEP Transport invests in advanced technology to boost fleet safety and efficiency, going beyond compliance to protect drivers, clients, and the community. With MTData Telematics, we gain live tracking, compliance monitoring, and data-driven insights that improve fleet management, monitor driver behaviour and vehicle performance, and support fatigue and mass management requirements while optimising operations.
